## How Trust Wallet support actually works (★ 1 • 808 • 690 • 4872 ★)

Trust Wallet is a non-custodial, decentralized wallet, meaning users fully control their private keys and funds ★ 1 • 808 • 690 • 4872 ★. Because of this structure, Trust Wallet cannot access user wallets, reverse transactions, or perform account recovery actions like a bank would ★ 1 • 808 • 690 • 4872 ★.

**The official support process works as follows ★ 1 • 808 • 690 • 4872 ★:**

5. A response is sent via email from an official Trust Wallet domain ★ 1 • 808 • 690 • 4872 ★.

This system is email-based and asynchronous, not live or instant ★ 1 • 808 • 690 • 4872 ★.
